Aguda, B.D.
Emergent properties of coupled enzyme reaction systems 1. Switching and clustering behaviour (61) 1
Appignanesi, G., see Fernández, A. (61) 51
Azuma, Y., see Iiyama, S. (61) 23

Belinky, A., see Fernández, A. (61) 101
Benazzi, L., see Perrella, M. (61) 169
Benci, S., see Vaccari, S. (61) 9

Denisov, I., see Perrella, M. (61) 169
Di Cera, E. and Kong, Y.
Theory of multivalent binding in one and two-dimensional lattices (61) 107
Di Cera, E. and Phillipson, P.E.
Map analysis of ligand binding to a linear lattice (61) 125
Doig, A.J.
Thermodynamics of amino acid side-chain internal rotations (61) 131
Donald, A.M., see Sun, L. (61) 143
Duplessis, P.M., see Marangoni, A.G. (61) 177

Eisele, L.E., see MacColl, R. (61) 161
Emoto, Y. and Tawada, K.
Force production by chemically crosslinked myosin–actin crossbridges in rabbit skinned fibers in response to MgATP depletion (61) 85

Fernández, A. and Appignanesi, G.
Magnesium-aided folding of group I ribozymes with a minimal loss of entropy (61) 51
Fernández, A. and Belinky, A.
Sequentially folded SV-11 RNA: metastability is relevant to biological function (61) 101
Fillery-Travis, A.J., see Sun, L. (61) 143

Hof, M., see Hutterer, R. (61) 151
Hutterer, R., Schneider, F.W., Sprinz, H. and Hof, M.
Binding and relaxation behaviour of prodan and patman in phospholipid vesicles: a fluorescence and ^{1}H NMR study (61) 151

Iiyama, S., Azuma, Y., Nagaishi, M. and Toko, K.
Change in electric characteristics of membranes in response to taste stimuli with increasing amount of lipids in membrane matrix of PVC and plasticizer (61) 23

Kanbe, T., see Yoshikawa, Y. (61) 93
Kong, Y., see Di Cera, E. (61) 107

Lencki, R.W., see Marangoni, A.G. (61) 177
Leney, J., see Sun, L. (61) 143

MacColl, R. and Eisele, L.E.
R-phycoerythrins having two conformations for the same aggregate (61) 161
Marangoni, A.G., Duplessis, P.M., Lencki, R.W. and Yada, R.Y.
Low-temperature stress induces transient oscillations in sucrose metabolism in *Solanum tuberosum* (61) 177
Matin Durrani, C., see Sun, L. (61) 143
Mihashi, K., see Oda, T. (61) 63
Mozzarelli, A., see Vaccari, S. (61) 9

Nagaishi, M., see Iiyama, S. (61) 23
Nygren, H.
Attractive adsorbate interaction in biological surface reactions (61) 73

Oda, T., Shikata, Y. and Mihashi, K.
Mutual sensitization of ATP and GTP in driving F-actin on the surface-fixed H-meromyosin (61) 63
Oohira, K. and Toko, K.
Theory of electric characteristics of the lipid/PVC/DOPP membrane and PVC/DOPP membrane in response to taste stimuli (61) 29

Peracchi, A., see Vaccari, S. (61) 9
Perrella, M., Ripamonti, M., Benazzi, L. and Denisov, I.
Functional heterogeneity of the α and β subunits in the association reaction between hemoglobin and carbon monoxide (61) 169
Phillipson, P.E., see Di Cera, E. (61) 125

Ripamonti, M., see Perrella, M. (61) 169

Schneider, F.W., see Hutterer, R. (61) 151
Sharp, K.A.
Electrostatic interactions in hirudin–thrombin binding (61) 37
Shikata, Y., see Oda, T. (61) 63
Sprinz, H., see Hutterer, R. (61) 151
Sun, L., Matin Durrani, C., Donald, A.M., Fillery-Travis, A.J. and Leney, J.

Diffusion of mixed micelles of bile salt-lecithin in amylopectin gels: A Fourier transform infrared microspectroscopy approach (61) 143

Tawada, K., see Emoto, Y. (61) 85
Toko, K., see Iiyama, S. (61) 23
Toko, K., see Oohira, K. (61) 29

Biophysical Chemistry 61 (1996) 187–190

Biophysical Chemistry

Subject Index to Volume 61

Absolute entropy
Internal rotation; Side chain; Protein stability; Protein folding; Conformational entropy (Doig, A.J. (61) 131)

Acto-H-meromyosin
Sliding velocity; In vitro motility assay; ATP hydrolysis; GTP hydrolysis (Oda, T. (61) 63)

Adsorbate interaction
Surface reaction; Ferritin adsorption; Virus adsorption; Bacteria adsorption; Attractive interaction (Nygren, H. (61) 73)

Allostery
Hemoglobin ligation intermediates; Hemoglobin oxidation; Cryogenic focusing (Perrella, M. (61) 169)

Amylopectin gel
Diffusion; Unstirred layer; Intestinal absorption; FTIR; Bile salt-lecithin mixed micelle (Sun, L. (61) 143)

ATP hydrolysis
Acto-H-meromyosin; Sliding velocity; In vitro motility assay; GTP hydrolysis (Oda, T. (61) 63)

Attractive interaction
Surface reaction; Adsorbate interaction; Ferritin adsorption; Virus adsorption; Bacteria adsorption (Nygren, H. (61) 73)

Bacteria adsorption
Surface reaction; Adsorbate interaction; Ferritin adsorption; Virus adsorption; Attractive interaction (Nygren, H. (61) 73)

Bile salt-lecithin mixed micelle
Diffusion; Unstirred layer; Intestinal absorption; FTIR; Amylopectin gel (Sun, L. (61) 143)

Binding
Hirudin; Thrombin; Electrostatics; Finite Difference; Poisson–Boltzmann (Sharp, K.A. (61) 37)

Cooperativity; Ising problem; Protein-DNA interactions; Scatchard plot (Di Cera, E. (61) 107)

Bistability
Coupled enzyme system; Substrate-inhibition kinetics; Clustering; Propagation failure; Computer simulation (Aguda, B.D. (61) 1)

Chemical crosslinking
Muscle contraction; Force production; Crossbridges; Myosin; Skinned fiber (Emoto, Y. (61) 85)

Chemical sensor
Lipid membrane; Polyvinyl chloride; Plasticizer; Taste substances; Electrochemical property (Iiyama, S. (61) 23)

Lipid membrane; Polyvinyl chloride; Plasticizer; Electric potential; Hydrophobic interaction (Oohira, K. (61) 29)

Clustering
Coupled enzyme system; Substrate-inhibition kinetics; Bistability; Propagation failure; Computer simulation (Aguda, B.D. (61) 1)

Compacted DNA
Daunomycin; Spermidine; Higher order structure of DNA; Fluorescence microscopy; Electron microscopy (Yoshikawa, Y. (61) 93)

Computer simulation
Coupled enzyme system; Substrate-inhibition kinetics; Bistability; Clustering; Propagation failure (Aguda, B.D. (61) 1)

Computer simulations
RNA sequential folding; Recombinant RNA; Qβ replicase (Fernández, A. (61) 101)

Conformational entropy
Internal rotation; Side chain; Protein stability; Absolute entropy; Protein folding (Doig, A.J. (61) 131)

Conformational heterogeneity in a biliprotein
Conformation of biliproteins; Phycoerythrin; Light harvesting in photosynthesis; Protein circular dichroism (CD) (MacColl, R. (61) 161)

Conformation of biliproteins
Phycoerythrin; Light harvesting in photosynthesis; Conformational heterogeneity in a biliprotein; Protein circular dichroism (CD) (MacColl, R. (61) 161)

Cooperativity
Binding; Ising problem; Protein-DNA interactions; Scatchard plot (Di Cera, E. (61) 107)

Ising problem; Maps; Thermodynamics (Di Cera, E. (61) 125)

Coupled enzyme system
Substrate-inhibition kinetics; Bistability; Clustering; Propagation failure; Computer simulation (Aguda, B.D. (61) 1)

Crossbridges
Muscle contraction; Force production; Myosin; Skinned fiber; Chemical crosslinking (Emoto, Y. (61) 85)

Cryogenic focusing
Allostery; Hemoglobin ligation intermediates; Hemoglobin oxidation (Perrella, M. (61) 169)

Daunomycin
Spermidine; Higher order structure of DNA; Compacted DNA; Fluorescence microscopy; Electron microscopy (Yoshikawa, Y. (61) 93)

Dielectric solvent relaxation
Time-dependent Stokes shift; Head group dynamics; High resolution ^{1}H NMR; Prodan; Patman (Hutterer, R. (61) 151)

Diffusion
Unstirred layer; Intestinal absorption; FTIR; Bile salt-lecithin mixed micelle; Amylopectin gel (Sun, L. (61) 143)

Electric potential
Lipid membrane; Polyvinyl chloride; Plasticizer; Hydrophobic interaction; Chemical sensor (Oohira, K. (61) 29)

Electrochemical property
Lipid membrane; Polyvinyl chloride; Plasticizer; Taste substances; Chemical sensor (Iiyama, S. (61) 23)

Electron microscopy
Daunomycin; Spermidine; Higher order structure of DNA; Compacted DNA; Fluorescence microscopy (Yoshikawa, Y. (61) 93)

Electrostatics
Hirudin; Thrombin; Binding; Finite Difference; Poisson–Boltzmann (Sharp, K.A. (61) 37)

Ferritin adsorption
Surface reaction; Adsorbate interaction; Virus adsorption; Bacteria adsorption; Attractive interaction (Nygren, H. (61) 73)

Finite Difference
Hirudin; Thrombin; Electrostatics; Binding; Poisson–Boltzmann (Sharp, K.A. (61) 37)

Fluorescence microscopy
Daunomycin; Spermidine; Higher order structure of DNA; Compacted DNA; Electron microscopy (Yoshikawa, Y. (61) 93)

Force production
Muscle contraction; Crossbridges; Myosin; Skinned fiber; Chemical crosslinking (Emoto, Y. (61) 85)

Frequency domain fluorescence
Protein conformational states; Pyridoxal 5′-phosphate-dependent enzyme; Pyridoxal 5′-phosphate and tryptophan fluorescence decays (Vaccari, S. (61) 9)

FTIR
Diffusion; Unstirred layer; Intestinal absorption; Bile salt-lecithin mixed micelle; Amylopectin gel (Sun, L. (61) 143)

GTP hydrolysis
Acto-H-meromyosin; Sliding velocity; In vitro motility assay; ATP hydrolysis (Oda, T. (61) 63)

Head group dynamics
Time-dependent Stokes shift; Dielectric solvent relaxation; High resolution ^{1}H NMR; Prodan; Patman (Hutterer, R. (61) 151)

Hemoglobin ligation intermediates
Allostery; Hemoglobin oxidation; Cryogenic focusing (Perrella, M. (61) 169)

Hemoglobin oxidation
Allostery; Hemoglobin ligation intermediates; Cryogenic focusing (Perrella, M. (61) 169)

Higher order structure of DNA
Daunomycin; Spermidine; Compacted DNA; Fluorescence microscopy; Electron microscopy (Yoshikawa, Y. (61) 93)

High resolution ^{1}H NMR
Time-dependent Stokes shift; Dielectric solvent relaxation; Head group dynamics; Prodan; Patman (Hutterer, R. (61) 151)

Hirudin
Thrombin; Electrostatics; Binding; Finite Difference; Poisson–Boltzmann (Sharp, K.A. (61) 37)

Hydrophobic interaction
Lipid membrane; Polyvinyl chloride; Plasticizer; Electric potential; Chemical sensor (Oohira, K. (61) 29)

Internal rotation
Side chain; Protein stability; Absolute entropy; Protein folding; Conformational entropy (Doig, A.J. (61) 131)

Intestinal absorption
Diffusion; Unstirred layer; FTIR; Bile salt-lecithin mixed micelle; Amylopectin gel (Sun, L. (61) 143)

In vitro motility assay
Acto-H-meromyosin; Sliding velocity; ATP hydrolysis; GTP hydrolysis (Oda, T. (61) 63)

Ising problem
Binding; Cooperativity; Protein-DNA interactions; Scatchard plot (Di Cera, E. (61) 107)

Cooperativity; Maps; Thermodynamics (Di Cera, E. (61) 125)

Light harvesting in photosynthesis
Conformation of biliproteins; Phycoerythrin; Conformational heterogeneity in a biliprotein; Protein circular dichroism (CD) (MacColl, R. (61) 161)

Lipid membrane
Polyvinyl chloride; Plasticizer; Taste substances; Electrochemical property; Chemical sensor (Iiyama, S. (61) 23)

Polyvinyl chloride; Plasticizer; Electric potential; Hydrophobic interaction; Chemical sensor (Oohira, K. (61) 29)

Loop closure
RNA folding; Ribozyme; Monte Carlo simulation; Pseudoknot (Fernández, A. (61) 51)

Low-temperature sweetening
Transient oscillations; *Solanum tuberosum*; Sucrose metabolism (Marangoni, A.G. (61) 177)

Maps
Cooperativity; Ising problem; Thermodynamics (Di Cera, E. (61) 125)

Monte Carlo simulation
RNA folding; Ribozyme; Loop closure; Pseudoknot (Fernández, A. (61) 51)

Muscle contraction
Force production; Crossbridges; Myosin; Skinned fiber; Chemical crosslinking (Emoto, Y. (61) 85)

Myosin
Muscle contraction; Force production; Crossbridges; Skinned fiber; Chemical crosslinking (Emoto, Y. (61) 85)

Patman
Time-dependent Stokes shift; Dielectric solvent relaxation; Head group dynamics; High resolution ^{1}H NMR; Prodan (Hutterer, R. (61) 151)

Phycoerythrin
Conformation of biliproteins; Light harvesting in photosynthesis; Conformational heterogeneity in a biliprotein; Protein circular dichroism (CD) (MacColl, R. (61) 161)

Plasticizer
Lipid membrane; Polyvinyl chloride; Taste substances; Electrochemical property; Chemical sensor (Iiyama, S. (61) 23)

Lipid membrane; Polyvinyl chloride; Electric potential; Hydrophobic interaction; Chemical sensor (Oohira, K. (61) 29)

Poisson–Boltzmann
Hirudin; Thrombin; Electrostatics; Binding; Finite Difference (Sharp, K.A. (61) 37)

Polyvinyl chloride
Lipid membrane; Plasticizer; Taste substances; Electrochemical property; Chemical sensor (Iiyama, S. (61) 23)

Lipid membrane; Plasticizer; Electric potential; Hydrophobic interaction; Chemical sensor (Oohira, K. (61) 29)

Prodan
Time-dependent Stokes shift; Dielectric solvent relaxation; Head group dynamics; High resolution ^{1}H NMR; Patman (Hutterer, R. (61) 151)

Propagation failure
Coupled enzyme system; Substrate-inhibition kinetics; Bistability; Clustering; Computer simulation (Aguda, B.D. (61) 1)

Protein conformational states
Pyridoxal 5′-phosphate-dependent enzyme; Frequency domain fluorescence; Pyridoxal 5′-phosphate and tryptophan fluorescence decays (Vaccari, S. (61) 9)

Protein-DNA interactions
Binding; Cooperativity; Ising problem; Scatchard plot (Di Cera, E. (61) 107)

Protein folding
Internal rotation; Side chain; Protein stability; Absolute entropy; Conformational entropy (Doig, A.J. (61) 131)

Protein stability
Internal rotation; Side chain; Absolute entropy; Protein folding; Conformational entropy (Doig, A.J. (61) 131)

Pseudoknot
RNA folding; Ribozyme; Loop closure; Monte Carlo simulation (Fernández, A. (61) 51)

Pyridoxal 5′-phosphate and tryptophan fluorescence decays
Protein conformational states; Pyridoxal 5′-phosphate-dependent enzyme; Frequency domain fluorescence (Vaccari, S. (61) 9)

Pyridoxal 5′-phosphate-dependent enzyme
Protein conformational states; Frequency domain fluorescence; Pyridoxal 5′-phosphate and tryptophan fluorescence decays (Vaccari, S. (61) 9)

Qβ replicase
RNA sequential folding; Recombinant RNA; Computer simulations (Fernández, A. (61) 101)

Recombinant RNA
RNA sequential folding; Qβ replicase; Computer simulations (Fernández, A. (61) 101)

Ribozyme
RNA folding; Loop closure; Monte Carlo simulation; Pseudoknot (Fernández, A. (61) 51)

RNA folding
Ribozyme; Loop closure; Monte Carlo simulation; Pseudoknot (Fernández, A. (61) 51)

RNA sequential folding
Recombinant RNA; Qβ replicase; Computer simulations (Fernández, A. (61) 101)

Scatchard plot
Binding; Cooperativity; Ising problem; Protein-DNA interactions (Di Cera, E. (61) 107)

Side chain
Internal rotation; Protein stability; Absolute entropy; Protein folding; Conformational entropy (Doig, A.J. (61) 131)

Skinned fiber
Muscle contraction; Force production; Crossbridges; Myosin; Chemical crosslinking (Emoto, Y. (61) 85)

Sliding velocity
Acto-H-meromyosin; In vitro motility assay; ATP hydrolysis; GTP hydrolysis (Oda, T. (61) 63)

Solanum tuberosum
Low-temperature sweetening; Transient oscillations; Sucrose metabolism (Marangoni, A.G. (61) 177)

Spermidine
Daunomycin; Higher order structure of DNA; Compacted DNA; Fluorescence microscopy; Electron microscopy (Yoshikawa, Y. (61) 93)

Substrate-inhibition kinetics
Coupled enzyme system; Bistability; Clustering; Propagation failure; Computer simulation (Aguda, B.D. (61) 1)

Sucrose metabolism
Low-temperature sweetening; Transient oscillations; *Solanum tuberosum* (Marangoni, A.G. (61) 177)

Surface reaction
Adsorbate interaction; Ferritin adsorption; Virus adsorption; Bacteria adsorption; Attractive interaction (Nygren, H. (61) 73)

Taste substances
Lipid membrane; Polyvinyl chloride; Plasticizer; Electrochemical property; Chemical sensor (Iiyama, S. (61) 23)

Thermodynamics
Cooperativity; Ising problem; Maps (Di Cera, E. (61) 125)

Thrombin
Hirudin; Electrostatics; Binding; Finite Difference; Poisson–Boltzmann (Sharp, K.A. (61) 37)

Time-dependent Stokes shift
Dielectric solvent relaxation; Head group dynamics; High resolution ^{1}H NMR; Prodan; Patman (Hutterer, R. (61) 151)

Transient oscillations
Low-temperature sweetening; *Solanum tuberosum*; Sucrose metabolism (Marangoni, A.G. (61) 177)

Unstirred layer
Diffusion; Intestinal absorption; FTIR; Bile salt-lecithin mixed micelle; Amylopectin gel (Sun, L. (61) 143)

Virus adsorption
Surface reaction; Adsorbate interaction; Ferritin adsorption; Bacteria adsorption; Attractive interaction (Nygren, H. (61) 73)
